DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 drawn to and adjustable locking mechanism, classified in class 70, subclass 127.
- II. Claims 27-34, drawn to a method for adjustably engaging and disengaging a door, classified in class 70, subclass 91The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for adjustably engaging and disengaging a door can be practiced with another materially different product since the method claims do not include the structural limitations of the claimed product.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3676

4. A telephone call was made to Grant Peters and Thomas Donovan on 7/28/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
